December 2021 Edition:
We wish you a Merry Techmas!

TURN AND TALK LEARN

1 You will be collecting your partner's thoughts. Listen actively!

2 "Turn and Learn your partner's thoughts by asking _____?"

3 Share your partner's thoughts with the whole group (with your partner's permission).

4 If your partner shares your thoughts, you can add on more!

Blended Learning to Spark Student Creativity What tools can my students use to create animations?

Scratch - MIT's free web-based program lets you program animations that include images, audio, text, speech bubbles, characters, and drawings. Learn more at bit.ly/motionscratch

#StopMotionSlides - Use Google Slides or PowerPoint to create flipbook-like animations by making incremental changes from one slide to the next. Using a familiar tool means the learning curve is low! Learn more at bit.ly/slidemotion

Flipgrid - Drag stickers or images to record animations. You can even narrate the animation, utilize backdrops, edit the video, or do stop motion by recording and pausing strategically. Learn more at bit.ly/flipgridmotion
